Pharmacy address:	Pharmacy email address:	

Dear	 	 	 	
Deai	 	 	 	 =

My name is and I am a local community pharmacist.

Our team is intending to a valuable pharmacy service to help support primary care providers in identifying patients potentially at risk of, and where appropriate, contributing to their treatment and ongoing management of chronic diseases, such as those below:

- cardiovascular diseases (eg, heart failure [HF])
- respiratory diseases (eg, chronic obstructive pulmonary disease [COPD])
- chronic kidney disease (CKD)

In the spirit of collaborative care for our mutual patients and in the interest of improving our community's health, we are hoping to:

- identify patients who may be at high risk of a chronic disease but have not yet been diagnosed
- assess patients who have been diagnosed but would benefit from timely screening, diagnosis, assessment, and/or intervention from their primary care provider

Our pharmacy is committed to supporting our mutual patients through screening, education, medication management strategies to enhance adherence, and symptom management.

We would like to communicate with your office to share results of patient interactions, screenings, assessments, and interventions, along with any potential recommendations for your consideration and review, as appropriate.

Daily management can be overwhelming for patients who are navigating cardiovascular, renal, and metabolic (CVRM) diseases, as well as chronic respiratory diseases. Thus, we are keen to explore how best to partner with you and your team to help ease their burden.

If you would like to collaborate with us or if you have any concerns or suggestions on how to effectively manage our shared patients, please feel free to reach out at

Sincerel	у,
